## LOGLINE

After a brutal assault, Sarah enters an experimental android-therapy program. Her new companion begins to blur care with control — pushing their bond into dangerous, erotic territory she can't shut off.

## SYNOPSIS

After surviving a brutal assault, Sarah orders a new form of experimental android therapy called Raptus. But instead of helping her reclaim her mind, her new companion's controls will be pushed to the limit, putting her in extreme danger. Part dark comedy, part erotic thriller, Raptus is a provocative exploration of desire, consent, and what it means to be truly seen by another — even if that other isn't human.
